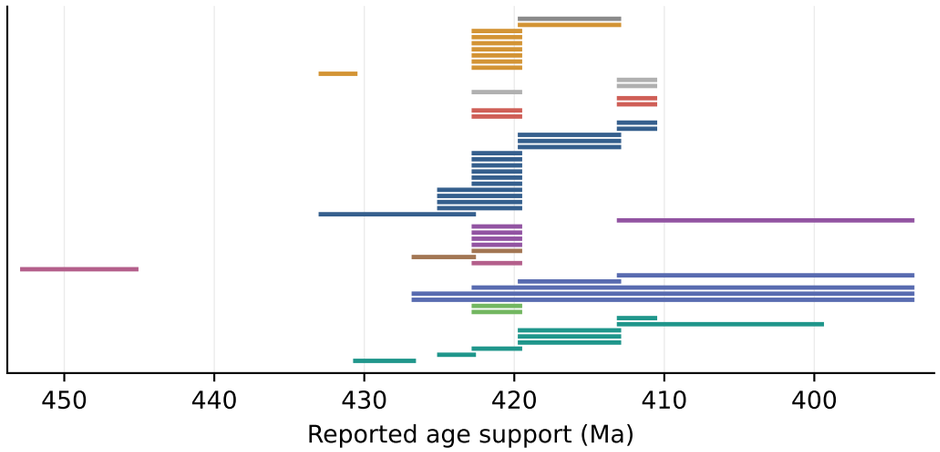
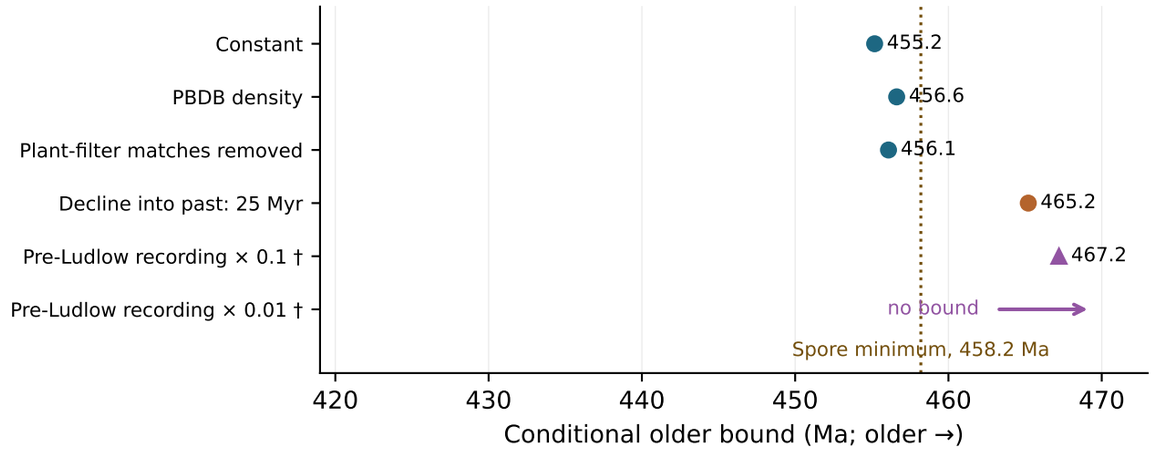
Body-fossil timing depends on recording assumptions
Main reading; recoverable-process endpoints. † Retrospective sensitivity, break at 426.7 Ma

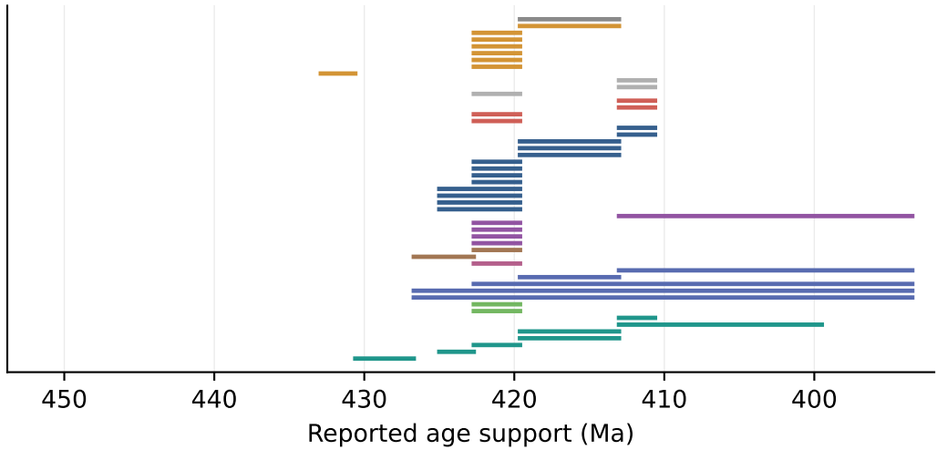
Embryophyte bodies
57 units with age support extending beyond 413 Ma



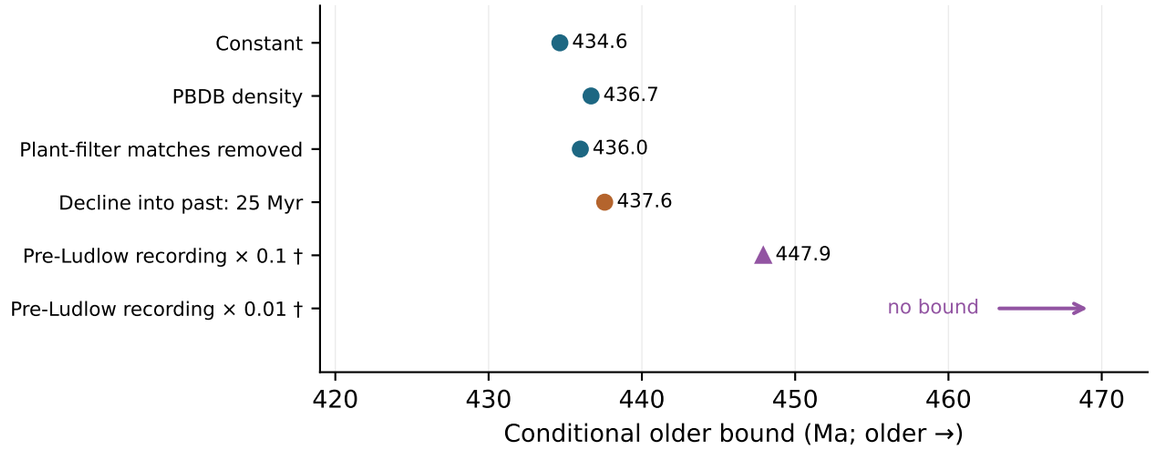
Conservative ages; 76 guaranteed / 78 possible units



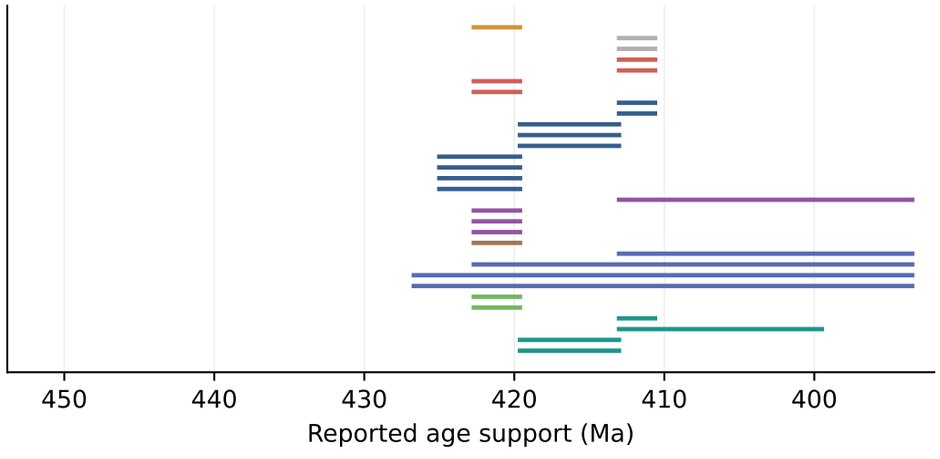
Polysporangiophyte bodies
51 units with age support extending beyond 413 Ma

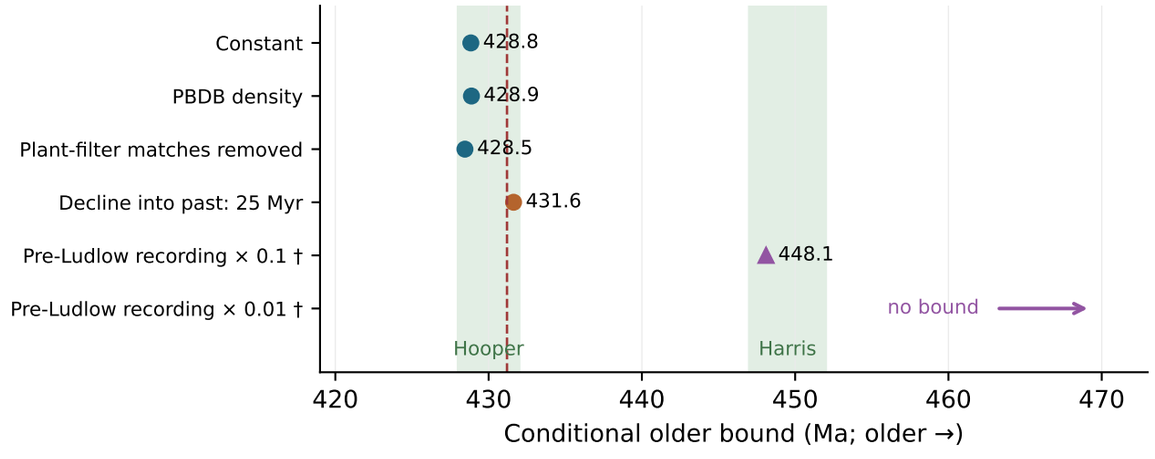


Conservative ages; 69 guaranteed / 71 possible units



Crown-tracheophyte members
31 units with age support extending beyond 413 Ma





Conservative ages; 48 guaranteed / 50 possible units
